**KEEP YOUR STUDENTS SAFE**

The internet is used more than ever in your schools, and you need to ensure that it’s safe, effective, and in line with regulations and district policies. Web Filter provides the controls, reports, and customizability you need to keep web use appropriate and CIPA compliant. From the smallest schools to the largest districts or consortiums, Web Filter scales and grows with your needs.

**Any device, any time**
Flexible policies let you ensure safety, CIPA compliance, and policy enforcement on networked and mobile devices – on- and off-campus.

**Powerful SSL insight**
See, control, and report on traffic across SSL sites like Google and YouTube for maximum insight across an increasingly secure web.

**Detailed reports**
From dashboards to drill-downs to real-time reports to custom reports, you see what you need when you need it. Reports can easily be automated and shared.

**AI Database**
Our AI-driven database combines our intelligent robot army, human team, and network of customers for real-time categorization and unparalleled accuracy.
Web Filter

What you get with Web Filter:

**Customizable safety for any device**
- Custom policies based on user, IP, group, organizational unit and domain
